CAREER PROFILE

Applied Computer Technology student at USIU-Africa, concentrating in Forensic IT and Cybercrime. Experienced in building embedded systems and database-backed desktop apps to web platforms and hardware-software integrations. My stack includes Python, Java, C#, C++, SQL, and HTML/CSS, and I've applied them across academic projects and real environments. I'm drawn to cybersecurity and intelligent systems, and I'm actively working toward that through certifications, hands-on projects, and industry affiliations. Combining software engineering fundamentals with cybersecurity coursework to target entry-level Security Analysis, Application Security, or Forensic IT roles.

SKILLS

- | | |
|--|---|
| • Programming Languages: Python, Java, C#, C++, SQL | • Networking & Security: Network Protocols, Network Security, Cyber Forensics |
| • Web Development & Databases: HTML5, CSS3, JavaScript (ES6), JSON, MySQL | • Tools & Version Control: Git, GitHub, AWS, JDBC, Java Swing |
| • Systems & Hardware Engineering: Arduino Microcontroller, Automation Logic, Digital Electronics (Tinkercad) | • Core Competencies: Systems Analysis, Data Privacy/Compliance, Vulnerability Assessment, Adaptability, Analytical Thinking |

PERSONAL INFORMATION

Languages Spoken:

- English: Native
- Swahili: Native
- French: Conversational

EDUCATION

BSc. Applied Computer Technology

May 2024 – September 2028

United States International University | Nairobi, Kenya

Treizza Kinanga | Aspiring Cyber Security Professional

Concentration: Forensic Information Technology & Cybercrime

GPA: 3.5

Projects

Student Expense & Budgeting App | *Android Studio, Java, SQLite*

- Developed a native Android application to help university students manage personal finances and track budgets.
- Designed persistent local data storage using SQLite to secure local user entries without external network dependencies.
- Built dynamic UI views for budget limits, expense categorization, and spending summaries.

Multi-Tier Hotel Management System | *Java, Java Swing, MySQL, JDBC*

- Engineered a role-based desktop enterprise app implementing OOP principles across Guest, Staff, and Admin portals.
- Integrated MySQL via JDBC to run secure CRUD operations for reservations and financial transactions.

Flood-Responsive Drainage & Soil System | *Tinkercad, C++, Dual Arduinos*

- Implemented Master/Slave microcontroller serial communication to process telemetry and automate drainage controls.
- Configured real-time warning states and exported metrics locally to an LCD and wirelessly via Bluetooth.

Dorm Safety & Environmental System | *Tinkercad, C++, Sensors*

- Built an automated multi-sensor room security system to detect smoke/gas breaches and trigger local buzzer alarms.

Recipe Discovery Web Platform | *HTML5, CSS Grid/Flexbox, JavaScript, JSON*

- Built a responsive web UI featuring async data fetching from JSON files and a native Dark/Light mode toggle.

PROFESSIONAL EXPERIENCE

Assistant Front Office Administrator and Clinical Assistant.

Treizza Kinanga | Aspiring Cyber Security Professional

March 2022 - May 2022

Bonita Centre for Women Health | Nairobi Kenya

Role Summary

A cross-functional role covering front-office operations, patient triaging, and clinical support. Worked directly with medical practitioners across departments, handled sensitive patient data, and kept things running smoothly in a fast-paced environment.

Responsibilities & Achievements

- **Sensitive Data Handling & Compliance:** Supported the clinic's transition from paper to digital records, cataloguing historical patient files with strict adherence to medical data privacy standards and information security compliance.
- **Patient Triage & Analytical Assessment:** Conducted initial vital checks and patient screenings daily, evaluating medical histories to prioritize urgent cases with situational awareness and time-sensitive decision-making.
- **Financial Operations & Access Control:** Managed front-desk billing transactions across M-Pesa, card terminals, and insurance verification platforms, maintaining accurate records with full financial accountability.
- **Process Optimization:** Streamlined appointment scheduling and check-in workflows to reduce wait times and improve daily operational efficiency.

VOLUNTEER WORK

Volunteer

January 2026-April 2026

Dorothy Children's Home | Nairobi, Kenya

Volunteered for four months supporting day-to-day operations at a children's home caring for kids aged 3 months to 15 years. Took on a range of responsibilities; from coordinating educational activities and managing donations to logistics and facility upkeep. Focused on building structure and consistency for the children while the team was short-staffed.

Key Responsibilities & Achievements

Treizza Kinanga | Aspiring Cyber Security Professional

- **Resource & Inventory Management:** Tracked and managed the distribution of food, clothing, and educational supplies, ensuring equitable allocation and accurate record-keeping transferable to technical asset management.
- **Operational Analysis:** Identified recurring bottlenecks and collaborated with the administrative team to implement a structured daily schedule, improving consistency and facility accountability.
- **Mentorship & Communication:** Designed and led academic learning sessions for over 20 children, sharpening the ability to communicate clearly and adapt explanations to diverse audiences.
- **Crisis Management:** Responded to unexpected logistical challenges and scheduling disruptions calmly and effectively under resource constraints.
